DETAILED ACTION

1. Claims 1-39 are now pending.

Election/Restrictions

2. The restriction requirement mailed March 9, 2007 has been withdrawn in light of the preliminary amendment filed April 6, 2007 wherein claims 27-39 were amended to be directly/ultimately dependent on claim 1 and wherein claims 40-51 were canceled. Therefore, applicant's arguments filed April 9, 2007 are now moot.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

5. Claims 1-39 are allowed over the prior art of record.
6. The following is an examiner's statement of reasons for allowance:

The prior art of record, alone or in combination, fails to teach or suggest: in claim 1, irradiating said active medium with light as to concentrate light flux through a volume portion of said storage medium so as to generate in said volume portion a detectable non-linear optical response characteristic of said concentration ratio, the non-linear optical response being related

to a $X^{(n)}$ process, where n is greater than 2, allowing for separating the non-linear optical response from other light signals due to a propagation direction characteristic of the non-linear optical response.

Claims 2-39 are dependent upon claim 1.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Vo-Dinh (US 4,999,810) discloses a method and apparatus for a Surface-Enhanced Raman Optical Data Storage system which utilizes a medium which exhibits the Surface Enhanced Raman Scattering phenomenon.

Rentzepis (US 5,268,862) discloses a three-dimensional memory having an active medium which is typically a photochromic material maintained in a three-dimensional polymer matrix.

Pavel (US 6,970,414) discloses a three-dimensional optical memory with fluorescent photosensitive material wherein writing is accomplished using a two-photon absorption process.

Glushko et al. (US 6,009,065) disclose an optical pickup for 3-D data storage reading from the multilayer fluorescent optical disk.
